EPA MEETING WITH ADEQ AND GEORGIA PACIFIC - On April 2nd the Water Quality Protection Division (6WQ) met with ADEQ and Georgia Pacific (GP) to address the reinstatement of 101(a)(2) uses in Coffee Creek and Mossy Lake near Crossett, Arkansas. 6WQ reinforced the conclusions of a 2007 study that confirmed the presence of key and indicator aquatic species in the waterbodies, necessitating adoption of aquatic life uses for the waterbodies. A range of options for the state (and company) was discussed, which included Use Attainability Analysis (UAA) to address economic aspects. The state also has the option to adopt use subcategories and site-specific criteria appropriate to protect the subcategories. 6WQ is preparing a letter outlining options for ADEQ to consider and act upon. **Contact: Jane Watson, x6653; Philip Crocker x6644; Matt Hubner x9736**
